

Below Ground Riser Extensions

Side Elevation

Plan View (Cover Removed)

Notes

- Most commonly used on our existing range of below ground trade waste tanks to be used as an extension/riser to bring the height up to ground level for Gattic lids to sit on.
- 1. Designed for our existing below ground tanks.
 - 2. Below ground tanks must be surrounded with 100mm thick concrete walls & base.
 - 3. The interceptor is to be constructed, installed and connected in accordance with the relevant plumbing regulations and ASNZ3500.2.
